IRN Automation – User Guide:

STEP 1 – ICEGATE ID & Password Configuration

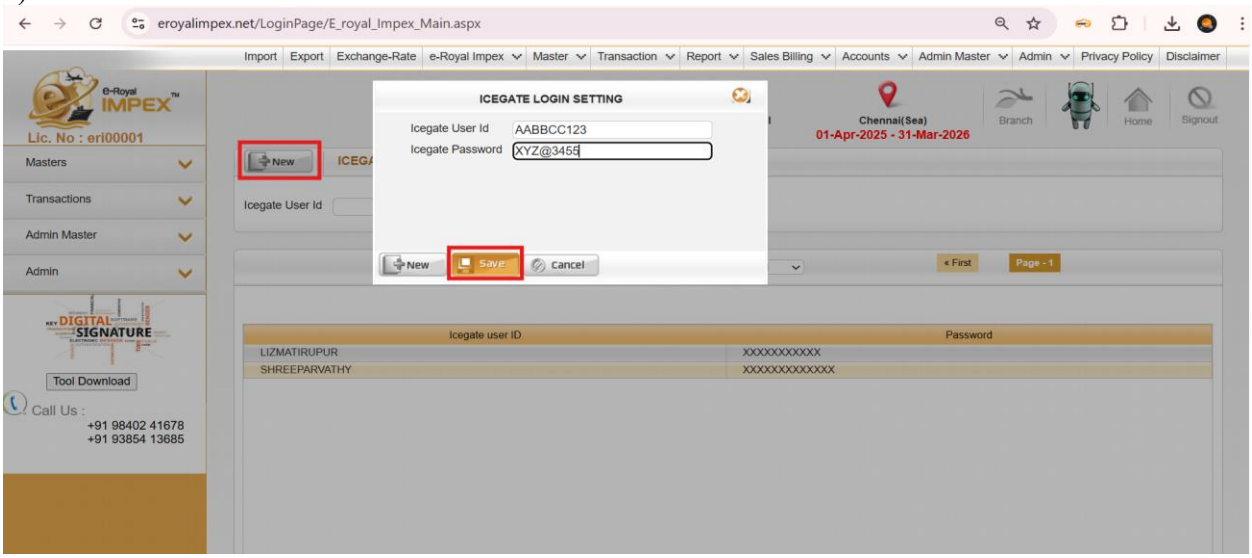

1. Go to the **e-Royal Impex** dropdown menu.
2. Select **"ICEGATE Login Setting"**.
3. Click **"New"**.
4. Enter the registered **ICEGATE ID**.
5. Enter the registered **Password**.
6. Click **Save**.

Note: Multiple ICEGATE IDs can be added and saved.

1).

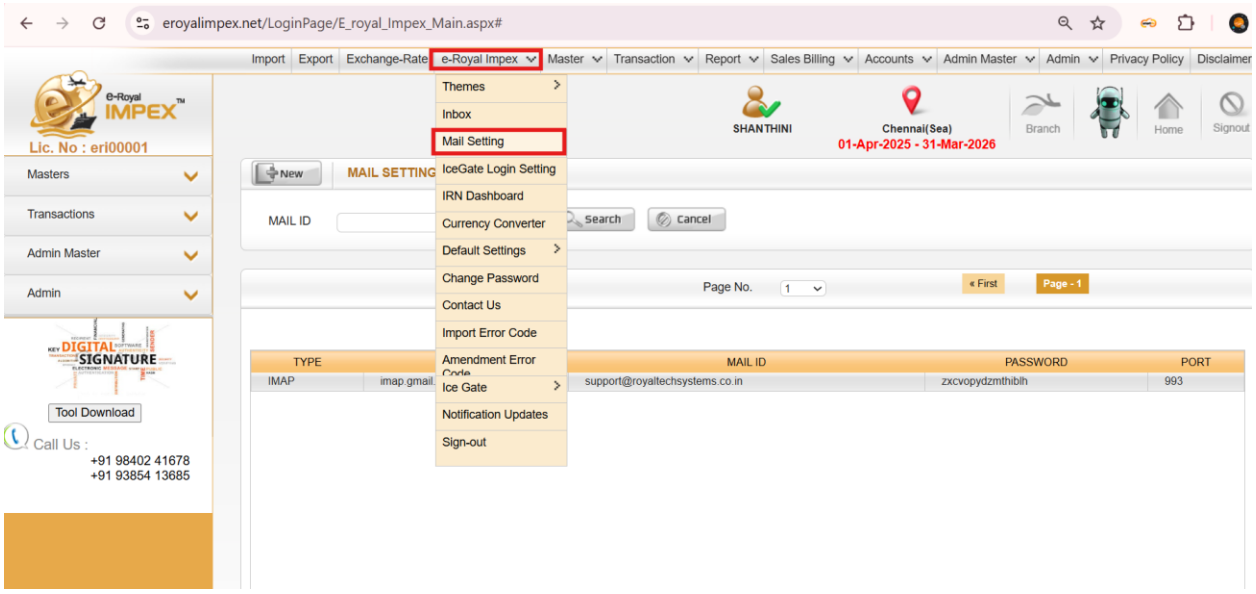

2).

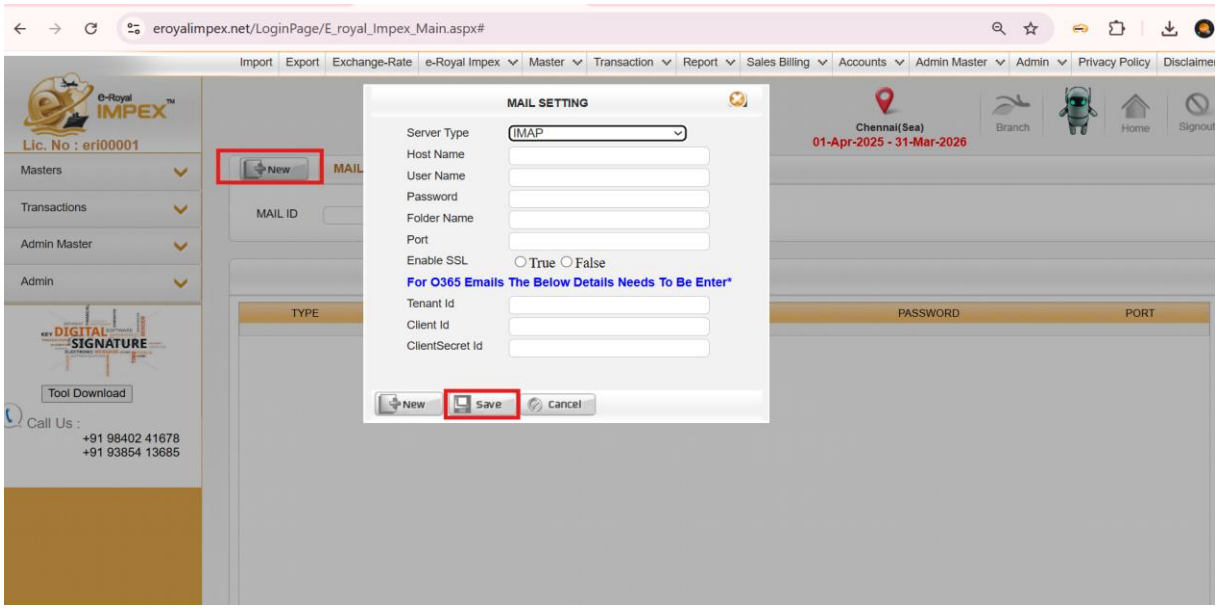

STEP 2 – ICEGATE Registered Email Configuration

1. Go to the **e-Royal Impex** dropdown menu.
2. Select **“Mail Settings”**.
3. Click **“New”**.
4. Enter the correct mail configuration details.
5. Ensure the email ID entered is the same email registered in ICEGATE (used for OTP).
6. Click **Save**.

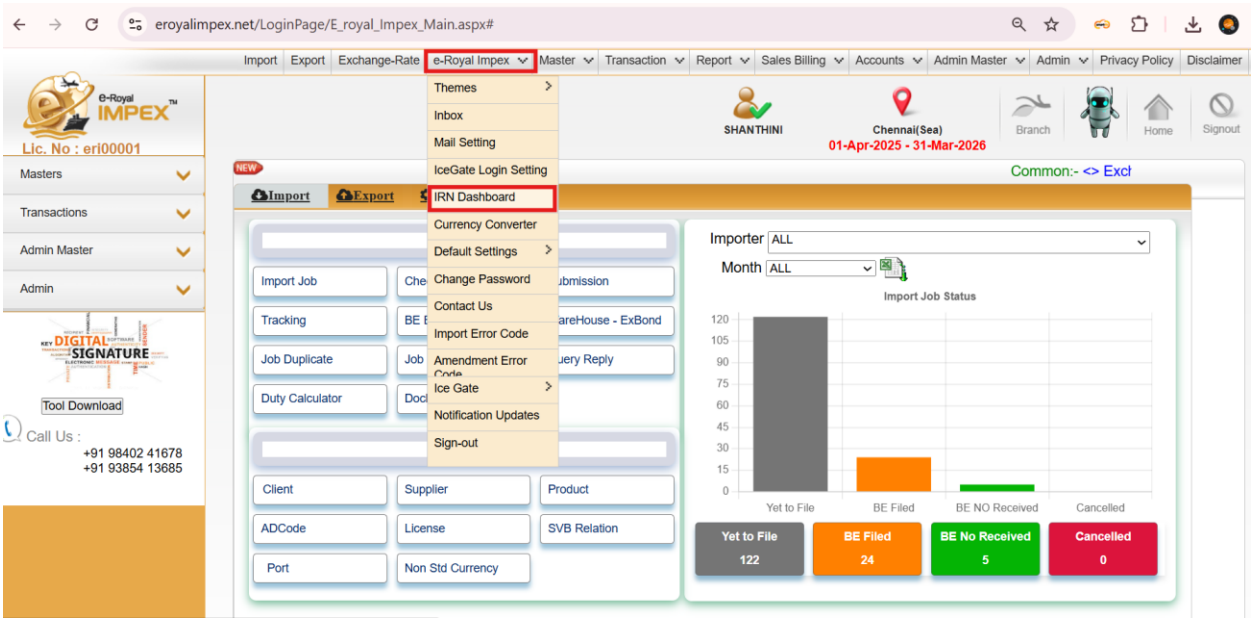

Important: Incorrect mail settings may result in OTP failure.

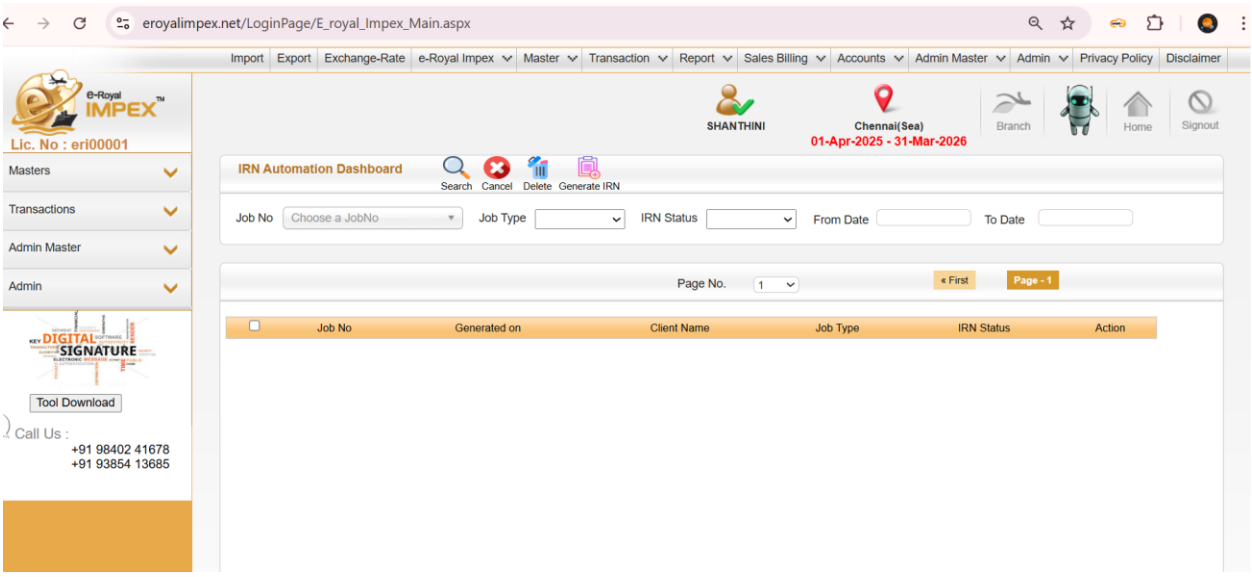

STEP 3 – IRN Automation Dashboard

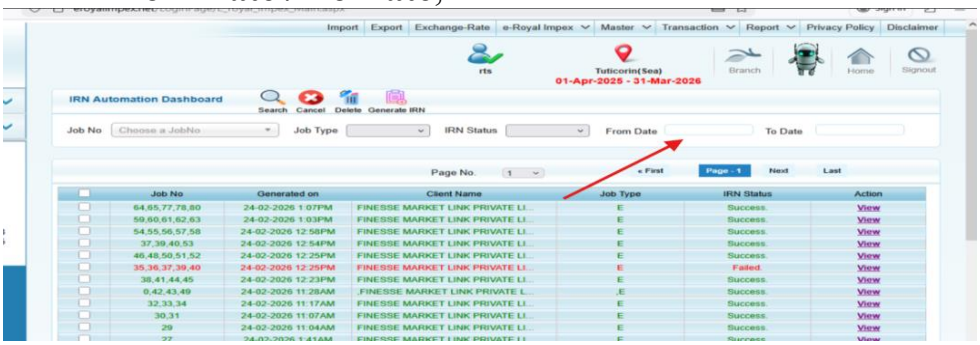

1. Login to **e-Royal Impex**
2. Click **e-Royal Impex** (top menu)
3. Select **IRN Dashboard**
4. The **IRN Automation Dashboard** screen will open

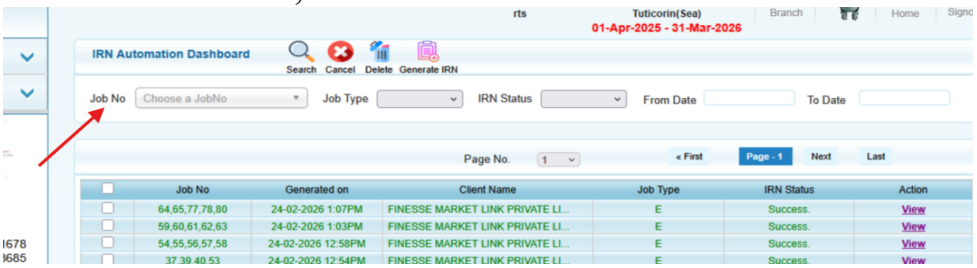

Dashboard Features:

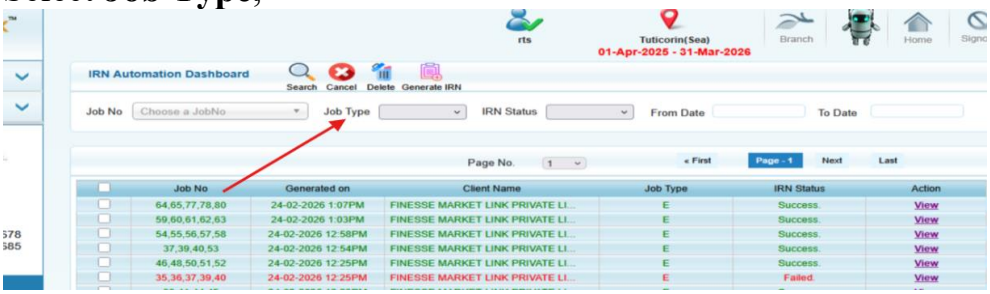

- Displays the current month IRN generated jobs.
- To view previous jobs:
  - Select **From Date / To Date**, OR

  - Enter **Job Number**, OR

  - Select **Job Type**,

  - Click the **Search** icon.

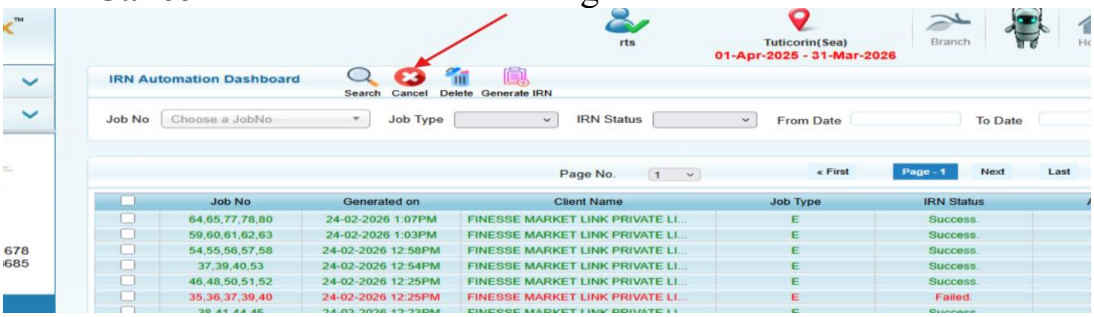

- To delete multiple jobs:
  - Select jobs using the checkbox on the left side.

- Click **Delete**.

- Click **Cancel** to return to the Home Page.

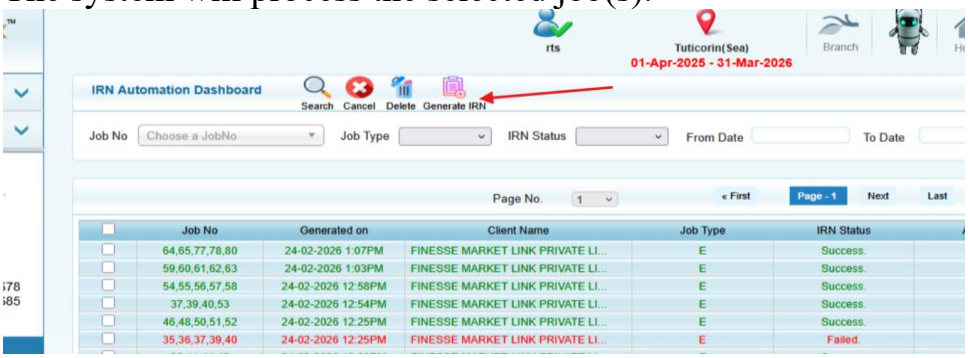

STEP 4 – IRN Generation Process

After configuring ICEGATE Login and Mail Settings, IRN can be generated from the IRN Dashboard.

Steps to Generate IRN:

1. Select the required job(s) from the list using the checkbox.
2. Click the **"Generate IRN"** button.
3. The system will process the selected job(s).

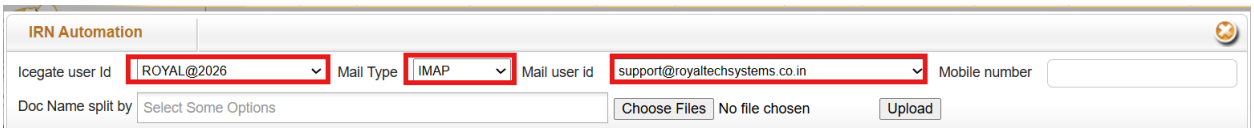

4.1 Enter Mandatory Details

Fill in the following required fields:

- Icegate User Id
- Mail Type
- Mail User Id

Ensure correct credentials are selected before proceeding.

4.2 Upload Supporting Documents

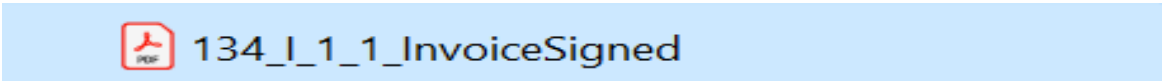

Click **"Choose Files"** and upload the required supporting documents.

Recommended File Naming Format:

JobNo~JobType~InvoiceSlNo~ItemSlNo~DocCode~Filename

Example:
1~I~1~2~380000~Invoice.pdf

If documents are saved in this format, the system will automatically fetch and map all details without any manual modification.

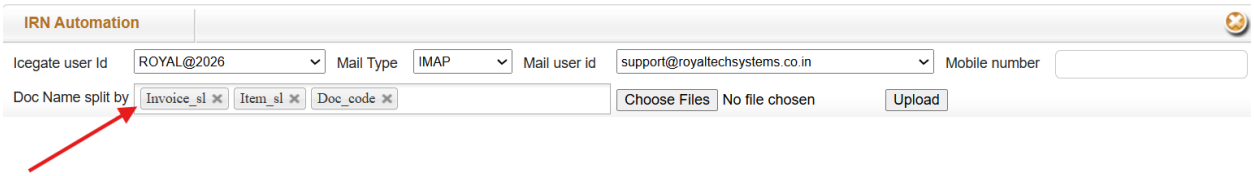

If File Naming Format is Different

Use the **"Doc Name split by"** option.

Select the correct order (Job No, Job Type, Invoice Sl No, Item Sl No, Doc Code) according to how the document name is saved.

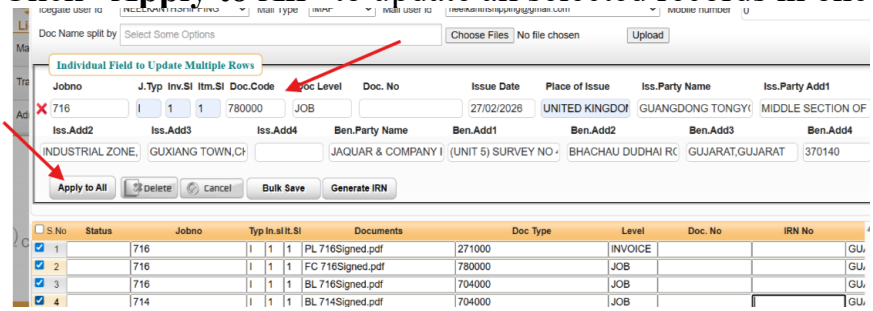

This ensures values are mapped and saved in the correct respective columns.

4.3 Modify / Manage Multiple Documents (If Required)

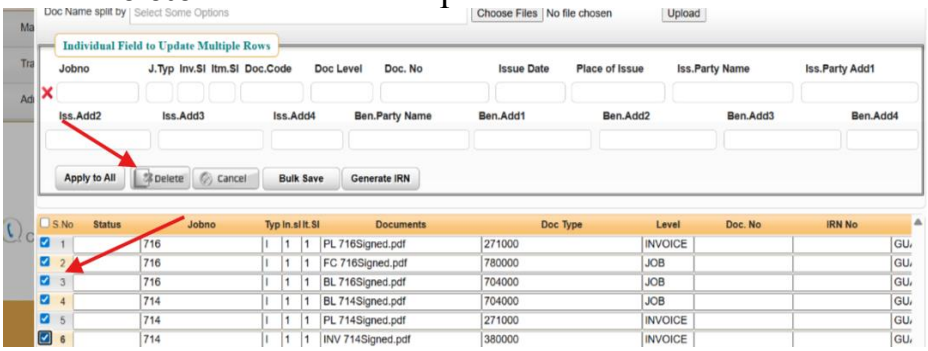

Individual Field to Update Multiple Rows

- Select multiple records.
- Edit required fields (Example: Doc Code).
- Click **"Apply to All"** to update all selected records in one click.

Delete Option

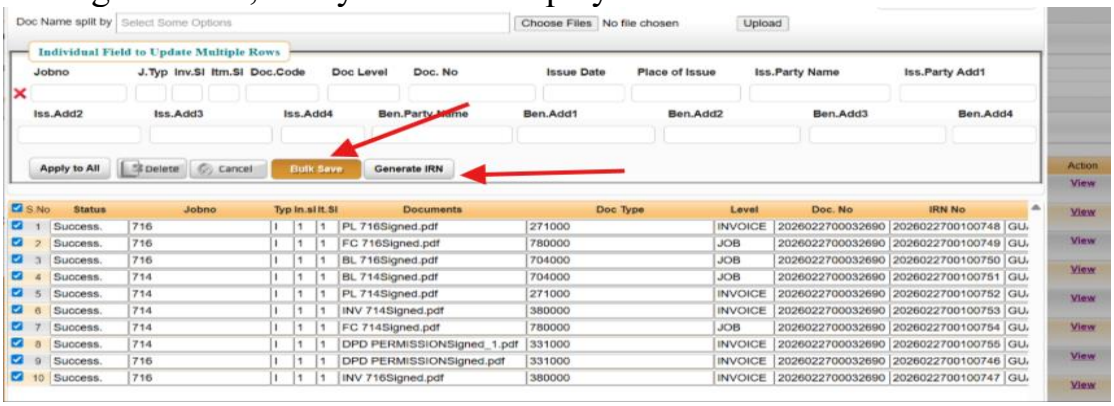

- Select unwanted documents.
- Click **Delete** to remove multiple records at once.

4.4 Save and Generate IRN

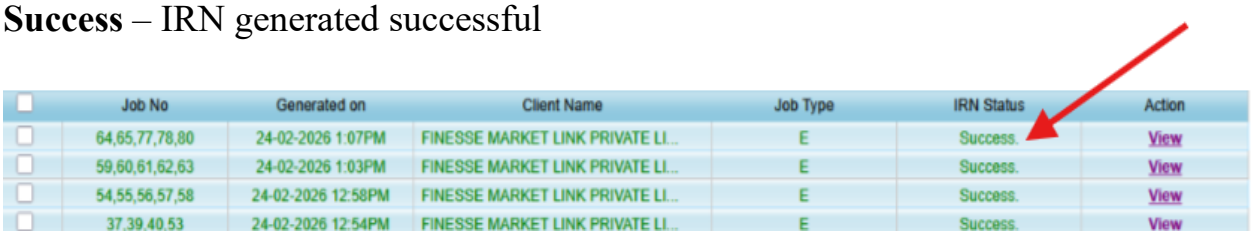

- Click **Bulk Save** to save all selected job invoice item supporting documents.
- Click **Generate IRN** to initiate the IRN automation process.

After generation, the system will display the status.

IRN Status Types:

- **Success** – IRN generated successful

- **In Progress** – IRN is under processing.

- **Failed** – Occurs due to incorrect document type code or validation issues.
